

JORDY BENITEZ

Omaha, NE | Software Engineer
(402) 649-9505 | jordybeni867@gmail.com

TECHNICAL SKILLS

Core Stack: C#, .NET, Angular, TypeScript, JavaScript, SQL Server, REST APIs

Cloud & Tools: Azure, Git, GitHub, Jira, Postman

Additional: Python, Java, SSO, webhooks

EXPERIENCE

Milliman - Omaha, NE | Software Engineering Intern

Aug 2024 - Present

- Create and maintain a high-volume **REST API** endpoint serving daily payload requests for an external health insurance partner to report employer-group and employee counts through backend development, **SQL**, and vendor coordination.
- Build an employee-dashboard renewal flow that surfaces current policies and lets users renew coverage without returning to the marketplace to find and reselect plans.
- Upgrade an **SSO** integration for an external health insurance partner's certificate migration, supporting secure authentication and complete integration.
- Translate stakeholder requirements into technical plans and contribute to design, code reviews, sprint planning, and production support.
- Deliver reporting and Zoho CRM **webhook** enhancements and support.
- Use **Azure DevOps** to manage deployments and monitor pipeline builds across development and production environments.

Norfolk Iron & Metal - Norfolk, NE | Software Engineering Intern

Jun 2023 - Jul 2024

- Developed and improved internal tools using **C#**, **Python**, and **SQL**.
- Participated in code reviews and maintained high quality standards across a large codebase.
- Contributed to migrating legacy codebases to modern standards and integrated updated tooling.

EDUCATION

University of Nebraska at Omaha - Omaha, NE

Expected Jul 2026

BS Computer Science and Programming

Northeast Community College - Norfolk, NE

May 2024

AA Computer Science and Programming

SELECTED PROJECT

Gate Access Management Capstone for Omaha Metro Storage:

- Built a native Windows desktop application using C#, Avalonia UI (MVVM pattern), SQLite, and Entity Framework Core.
- Implemented core modules for resident and storage unit management, credential authorization, and audit logging.
- Integrated QuestPDF to auto-generate structured system logs and administrative reports.
